

■ MEC

MEC? Who are they?

MEC, The Milwaukee Electronics Companies, is a 53 year old Electronic Product Design & Development firm that provides Electronic Manufacturing Services (EMS) for OEM's across the US & Canada.

What do they do?

They both design and build the "electronic brains" that make their customer's products function, or function better. Their unique blend of both PCB design and manufacturing of electronics assemblies and box-builds provides them with a unique understanding of Design for Manufacturability (DFM) and Design for Test (DFT).

Why do they matter?

They help their customers deliver new product ideas to market faster. On Time. On Budget. On Specification. On Cost Target. They deliver real value, whether they start with design or electronics manufacturing for you. Go to their website to find out how they can help.

■ Screaming Circuits

What is Screaming Circuits?

Screaming Circuits is a fast growing service division of MEC. They assemble prototype and short-run production printed circuits boards with parts as small as 0201 passives or as large as 1,700+ ball BGAs.

What do they do?

Screaming Circuits offers you the opportunity to solve your prototype problems. As fast as 24 hour service if you need it and as few as one board if that's all you need

Why does that matter?

It matters because we help keep your projects on time and your new products to market on time. We can help you **solve these problems**:

- **TIME:** *In a rush and out of project time to get prototypes built on time?*
- **CAPABILITY:** *Don't have SMT equipment to place critical components on your circuit boards?*
- **CAPACITY:** *Can't break into tyour own or your current supplier's production line to get your prototypes built?*

Go to their website and try it out. You don't need me for this one, you can order for yourself online. For any 1st Screaming Circuits orders, you'll get a 10% discount if you mention **me**!
